## Abstract

A checklist of the hawkmoth specimens housed in the Natural History Museum of the National Science Museum, Thailand (THNHM) is presented. A total of 1,405 specimens of 97 species, 39 genera in three subfamilies (Sphinginae, Smerinthinae, and Macroglossinae) are deposited in THNHM. With 58 species (821 non-type specimens, ca. 58% of the total specimens), Macroglossinae has the largest representation. The Sphingidae specimens were collected mainly in Thailand and other countries in Southeast Asia in the past 54 years. The high-resolution images of all species are provided.

## Keywords

Specimens, Natural History Museum, National Science Museum, Sphingidae, Thailand

## Introduction

Sphingidae (hawkmoths, sphinx moths) is amongst the best-known insect families worldwide, consisting of 1400 species in some 200 genera (Kitching and Cadiou, 2000). It is best represented in the tropics, but species are found in every region. The family was named by French zoologist Pierre André Latreille in 1802. Sphingids have become a model group for studies of genetics, physiology, development, plant-herbivore interactions, pollination biology, and biogeography (Kawahara *et al.*, 2009; Jeenkoed *et al.*, 2016; Chakraborty *et al.*, 2018; Polpinij, 2017). Unfortunately, the caterpillar of some species can be very destructive to agricultural crops. Though hawkmoths play important roles in the ecosystem, data on species lists and geographic distribution in Thailand remain limited, as well as the lack of a complete and up-to-date listing of the species (Azuma, 1990; Inoue *et al.*, 1997).

The Natural History Museum of the National Science Museum in Thailand (THNHM) was established in 1995 belonging to the Ministry of Higher Education, Science, Research, and Innovation. The museum maintains a large collection of plant, bird, amphibian, reptile, mammal, animal horn, antler, and insect specimens which is one of the most important collections in Southeast Asia. There are over 1,405 specimens of Sphingidae housed in THNHM, nearly all specimens were received from the Thailand Institute of Scientific and Technological Research (TISTR), collected during 1968 to 1973. Most of the specimens were unlabeled and mislabeled specimens. Furthermore, the THNHM's collection of Sphingidae had not been examined since 2000. Here, we updated a full species list and the geographical distribution in various provinces of Thailand. The present catalog checklist would be beneficial and useful to encourage the use of the collections for academic and personal research.

## Materials and methods

Every specimen of hawkmoth deposited in the THNHM was examined (Figures 1). Localities have been corrected when they were misspelled in the original labels; some additional locality information missing in specimen labels is also provided. Male and female specimens for each species were imaged using an Nikon micro Len 105 mm attached to a Nikon Z6 Mirrorless FX-Format Full-Frame 4K Ultra HD.

The list of the specimens is arranged alphabetically by genus and species, following the format:

### **Specific name author, publication date**

*Original name, author(s), publication date: pages of the original description. Type locality.*

**Non-type material examined.** *COUNTRY:* Number of specimen and sex (THNHM code), locality, date (months in Roman numerals), collector (leg.).

**Distribution.** Province.

**References.** Author(s) (publication year), if available.

**Figure 1.** Specimens and labels of hawk moth deposited in the THNHM. A, specimens of *Theretra clotho*; B, specimen and label of *Acherontia lachesis*; C, label of *Acherontia lachesis*

**Table 1.** Number of the Sphingidae specimens deposited in the Natural History Museum of the National Science Museum, Thailand.

Subfamilies	Number of Genera	Number of Species	Number of specimens
Sphinginae	9	11	202
Smerinthinae	12	28	382
Macroglossinae	18	58	821
<b>Total</b>	<b>39</b>	<b>97</b>	<b>1,405</b>

### Catalog of the Specimens

This catalog presents a list of the Sphingidae specimens deposited in THNHM. A total of 1,405 specimens belonging to 97 species (ca. 49% of all species recorded from Thailand), 39 genera in three subfamilies (Sphinginae, Smerinthinae, and Macroglossinae). With 58 species (821 non-type specimens, ca. 58% of the total specimens), Macroglossinae has the largest representation. The Sphingidae specimens were collected mainly in Thailand and other countries in Southeast Asia in the past 54 years.

***Cechetra lineosa* (Walker, 1856) (Figure 13E–F)**

*Chaerocampa lineosa* Walker, 1856: 144. Type locality. Silhet.

**Material Examined.** **NORTHERN:** 2♂ (THNHM-I-22375 and THNHM-I-22376), Chiang Mai Prov., Fang Dist., Doi Ang Khang Royal Project, 9.III.2002, W. Jaitrong leg.; 1♂ (THNHM-I-22380), Chiang Mai Prov., Mae Tang Dist., Ban Kued Chang, Hui Nam Dung N.P., 6.XI.2007, T. Jeenthong leg.; 1♂ (THNHM-I-26086), Chiang Mai Prov., Mae Taeng Dist., Mon-ungkate, 18.IV.1975, V. Sukapan leg.; 4♂ (THNHM-I-26087 to THNHM-I-26090), same locality and collector, 19.IV.1975.; 1♂ (THNHM-I-25019), same locality and same collector, 28.IV.1975. **WESTERN:** 2♂ (THNHM-I-22378 and THNHM-I-22382), Tak Prov., Um Phang Dist., Thung Yai Naresuan East W.S., Huai Nam Khiao, 24.IX.2016. T. Jeenthong leg.

**Distribution.** Chiang Mai and Tak Provinces.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010); Ponpinij (2017).

***Cechetra minor* (Butler, 1875) (Figure 13G–H)**

*Chaerocampa minor* Butler, 1875: 249. Type locality: India, Uttaranchal, Massuri [Mussoorie].

**Material Examined.** **WESTERN:** 1♂(THNHM-I-22379), Kanchanaburi Prov., Thong Pha Phum Dist., Thong Pha Phum N.P., 19.XII.2003, W. Jaitrong leg.; 1♂ (THNHM-I-22383), Kanchanaburi Prov., Thong Pha Phum Dist., Sahakorn Nikhom Subdist., 14.VII.2018, W. Jaitrong leg. **NORTH-EASTERN:** 1♂ (THNHM-I-22381), Loei Prov., Phu Luang Dist., Phu Luang W.S., Phu Luang Wildlife Research Station, 17°20' 34.1''N, 101°30'31.0''E, 915 m a.s.l., 25.IX.2009, T. Jeenthong leg.

**Distribution.** Kanchanaburi and Loei Provinces.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010); Ponpinij (2017); Thailand Nature Project (2021).

***Cechetra subangustata* Rothschild, 1920 (Figure 14A–B)**

*Cechenena lineosa subangustata* Rothschild, 1920: 482. Type locality: Indonesia, Sumatra [Sumatra], Benkoelen District [Bengkulu], Lebong Tandai.

**Material Examined.** **WESTERN:** 1♀ (THNHM-I-22377), Kanchanaburi Prov., Thong Pha Phum Dist., unknow date and collector.

**Distribution.** Kanchanaburi Province.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010); Ponpinij (2017).

***Cephalodes hylas* (Linnaeus, 1771) (Figure 14C–D)**

*Sphinx hylas* Linnaeus, 1771: 539. Type locality: China.

**Material Examined.** **NORTHERN:** 1♂ (THNHM-I-22374), Lampang Prov., Ngao Dist., Tham Pha Tao N.P., 1.VI.2004, T. Jeenthong leg. **WESTERN:** 1♀ (THNHM-I-25054), Kanchanaburi Prov., Mueang Dist., Rajabhat Kanchanaburi University, 28.III.2121, T. Jeenthong leg.

**Distribution.** Lampang and Kanchanaburi Provinces.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010); Ponpinij (2017).

***Cephalodes picus* (Cramer, 1777) (Figure 14E–F)**

*Sphinx picus* Cramer, 1777: 38, pl. 148, f. B. Type locality. India, coast of Coromandel [Tamil Nadu/Andhra Pradesh].

**Material Examined.** *EASTERN*: 1♀ (THNHM-I-22373), Chonburi Prov., Sri Racha Dist., Kasetsart Campus, 18.IV.2003, J. Nabhithabhata [= Jin] *et al.* leg.; 1♂ (THNHM-I-22682), Chachoengsao Prov., Tha Takiap Dist., Ban Nong Kok, Khao Ang Reu Nai W.S., 25.VI.2005, T. Jeenthong leg.

**Distribution.** Chonburi and Chachoengsao Provinces.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010).

#### *Daphnis hypothous* (Cramer, 1780) (Figure 14G–H)

*Sphinx hypothous* Cramer, 1780: 165. Type locality: Amboina.

**Material examined.** *NORTHERN*: 1♂ (THNHM-I-22398) and 1♀ (THNHM-I-22399), Chiang Mai Prov., Mae Tang Dist., Ban Kued Chang, Hui Nam Dung N. P., 6.XI.2007, T. Jeenthong leg., *WESTERN*: 2♂ (THNHM-I-22400 and THNHM-I-22401), Kanchanaburi, Thong Pa Poom Dist., Thong Pa Poom N.P., 19.XII.2003, W. Jaitrong leg.; 2♂ (THNHM-I-26017 and THNHM-I-26018), Kanchanaburi Prov., Sai Yok Dist., Ban Pu Toei, 19.VI.1971, S. Pongsa leg.; 1♀ (THNHM-I-26015), same locality and collector, 22.VI.1971., *NORTHEASTERN*: 3♂ (THNHM-I-22395 to THNHM-I-22397), Loei Prov., (Pu Ruar Dist., = Miss spelling as Pu Luang), Pu Luang W.S., Khok Nok Kraba, 17°16'52.4"N, 101°31'23.5"E, 1485 m., 26.IX.2009, T. Jeenthong leg.; 1♂ (THNHM-I-26013), Nakhon Ratchasima Prov., Pak Thong Chai Dist, 26.IV.1967, N. Kobayashi leg.; 1♂ (THNHM-I-26014), Nakhon Ratchasima Prov., Sakaerat, 10.VII.1968, Udom leg., 1♀ (THNHM-I-26016), same locality, 25.V.1967, S. Pongsapipatana leg.; 3♀ (THNHM-I-25014 and THNHM-I-25015 and THNHM-I-25024), Nakhon Ratchasima Prov., Pak Chong Dist., Khao Yai, 1-4.V.1973, L. Pakarnseree leg., *CENTRAL*: 2♂ (THNHM-I-22391 and THNHM-I-22392), Saraburi Prov., Kaeng Khoi Dist., Cha-om Subdist., Banpa Nature School, 23.VI.2020, T. Jeenthong leg.; 1♂ (THNHM-I-24170), same locality, 12.XII.2020, T. Anuttarakonwanit leg.; 2♂ (THNHM-I-24725 and THNHM-I-24726), same locality, 15.V.2021, W. Jaitrong & T. Jeenthong leg.; 1♂ (THNHM-I-25078), same locality and date, T. Anuttarakonwanit leg.; 1♀ (THNHM-I-25079), same locality and date, K. Phrammanee leg.; 2♂ (THNHM-I-22152 and THNHM-I-22153), same locality, 17.X.2020, P. Kamtharak leg.; 1♀ (THNHM-I-25140), same locality, 12.VI.2021, W. Jaitrong & T. Jeenthong leg. *EASTERN*: 2♂ (THNHM-I-22393 and THNHM-I-22394), Chanthaburi Prov., Khlung Dist., Ban Ang Et, 3.VIII.2014, W. Jaitrong leg.

**Distribution.** Chiang Mai, Kanchanaburi, Loei, Nakhon Ratchasima, Saraburi, and Chanthaburi Provinces.

**References.** Inoue *et al.* (1997); Seizi (1999); Koçak and Kemal (2010); Ponpinij (2017); Thailand Nature Project (2021).

#### *Daphnis nerii* (Linnaeus, 1758) (Figure 15A–B)

*Sphinx nerii* Linnaeus, 1758 1: 490. Type locality: Unknown.

**Material examined.** *CENTRAL*: 1♂ (THNHM-I-22405), Saraburi Prov., Muak Lek Dist., Thai Danish Daily farm, 10.I.2017, S. Tiangbangluang leg.; 1♀ (THNHM-I-22407), Pathum Thani Prov., Khlong Luang Dist., National Science Museum, unknown date, W. Jaitrong leg.; 1♀ (THNHM-I-22200), same locality, 1.III.2020, T. Jeenthong leg.; 1♂ (THNHM-I-26012), unknown locality, A.S.R.C.T., L. Pakanseree leg.

**Distribution.** Saraburi and Pathum Thani Provinces.

Jaitrong leg.; 1♂ (THNHM-I-25007), Nakhon Si Thammarat Prov., Sichon Dist., Khao Nan N.P., Huai Kaeo Waterfall, 30.X.2008, T. Jeenthong leg.

**Distribution.** Nakhon Ratchasima, Saraburi, and Nakhon Si Thammarat Provinces.

**References.** Inoue et al. (1997); Koçak and Kemal (2010).

#### ***Rhagastis albomarginatus* (Rothschild, 1894) (Figure 22E–F)**

*Metopsisilus albomarginatus* Rothschild, 1894: 78. Type locality: India, Assam [Meghalaya], Khasia Hills.

**Material examined.** **WESTERN:** 2♂ (THNHM-I-22550 and THNHM-I-22551), Tak Prov., Um Phang Dist., Thung Yai Naresuan east W.S., 24.IX.2016. T. Jeenthong leg.

**Distribution.** Tak Province.

**References.** Inoue et al. (1997); Koçak and Kemal (2010); Ponpinij (2017).

#### ***Rhagastis confusa* Rothschild and Jordan, 1903 (Figure 22G–H)**

*Rhagastis confusa* Rothschild and Jordan, 1903. Type locality: India.

**Material Examined.** **NORTHERN:** 1♂ (THNHM-I-22549), Chiang Mai Prov., Mae Tang, Ban kued Chang, Huai Nam Dang N.P., 19°19'0.41"E, 98°35'5.28"N, Elevation 1,722 m a.s.l., 6.XI.2007, T. Jeenthong leg.; 1♂ (THNHM-I-26123), Chiang Mai Prov., Mae Tang Dist., Monungkate, 18.IV.1975, V. Sukapan leg. **NORTHEASTERN:** 1♂ (THNHM-I-22548), Loei Prov., Phu Luang Dist., Phu Luang W.S., Phu Luang Wildlife Research Station, 17°20' 34.1"N, 101°30'31.0"E, Elevation 915 m a.s.l., 25.IX.2009, T. Jeenthong leg.

**Distribution.** Chiang Mai and Loei Provinces.

**References.** Inoue et al. (1997); Koçak and Kemal (2010); Ponpinij (2017).

#### ***Rhagastis olivacea* (Moore, 1872) (Figure 23A–B)**

*Pergesa olivacea* Moore, F. 1872: 567. Type locality: Simla, NW. Himalayas, 7000ft

**Material examined.** **NORTHERN:** 1♂ (THNHM-I-25017), Chiang Mai Prov., Mae Tang Dist., Monungkate, 19.IV.1975, V. Sukapan leg.

**Distribution.** Chiang Mai Province.

**References.** Inoue et al. (1997); Koçak and Kemal (2010); Ponpinij (2017).

#### ***Theretra alecto* (Linnaeus, 1758) (Figure 23C–D)**

*Sphinx alecto* Linnaeus, 1758: 492. Type locality: India.

**Material Examined.** **NORTHERN:** 1♂ (THNHM-I-26179), Chiang Mai Prov., Mae Tang Dist., 18.IV.1975, V. Sakavan leg. **NORTHEASTERN:** 1♂ (THNHM-I-22786), Nakhon Ratchasima [= Khorat] Prov., Wang Nam Khiao Dist., Sakaerat Environmental Research Station., 22.III.2021, W. Jaitrong & T. Jeenthong leg., **EASTERN:** 1♂ (THNHM-I-22634), Trat Prov., Mueang Dist.,

Trat Argo Forestry Research Station, 25.III.2010, T. Jeenthong leg.

**Distribution.** Chiang Mai, Nakhon Ratchasima, and Trat Provinces.

**References.** Inoue *et al.* (1997); Koçak and Kemal (2010); Ponpinij (2017).

### *Theretra boisduvalii* (Bugnion, 1839) (Figure 23E–F)

*Sphinx boisduvalii* Bugnion, 1839: 115. Type locality: Ile de Candie.

**Material Examined.** **NORTHERN:** 1♂ (THNHM-I-22606), Chiang Mai Prov., Fang Dist., Ang Khang Forest, 9.III.2002, W. Jaitrong leg., **NORTHEASTERN:** 1♂ (THNHM-I-22604), Loei Prov., Phu Luang Dist., Phu Luang W.S., Khoknokkaba, 17°16'52.3''N, 101°31'23.5''E, 1,485 m a.s.l., 26.IX.2009, T. Jeenthong leg.; 1♀ (THNHM-I-26131), Nakhon Ratchasima [= Khorat] Prov., Wang Nam Khiao Dist., Sakaerat Environmental Research Station., 10.X.1967, S. Pongsa leg. SP-II-ii-1.; 1♀ (THNHM-I-26132), Nakhon Ratchasima Prov., Pak Chong Dist., Khao Yai N.P., 1-4.V.1973, L. Pakarnseree leg., **CENTRAL:** 2♂ (THNHM-I-24757 and THNHM-I-24758), Saraburi Prov., Kaeng Khoi Dist., Cha-om Subdist., Banpa Nature School, light trap, 15.V.2021, W. Jaitrong & T. Jeenthong leg.; 1♂ (THNHM-I-25180) and 1♀ (THNHM-I-25181), same locality and collector, 12.VI.2021., **EASTERN:** 1♂ (THNHM-I-22552), Chachoengsao Prov., Tha Ta Kiap Dist., Ban Nong Kok, Khao Ang Rue Nai W.S., Lumchangwat Station, 27.X.2006, T. Jeenthong leg.; 2♂ (THNHM-I-22575 and THNHM-I-22602), Chanthaburi Prov., Pong Nam Ron Dist., Khlong Thap Mark, 12°54'31.3''N, 102°13'06.9''E, 18.V.2008, T. Jeenthong leg.; 1♂ (THNHM-I-22589), Trat Prov., Ko Kut [=Ko Kud] Dist., Ban Khlong Chao, 18.IV.2009, 11°37'26.4''N, 102°32'48.6''E, T. Jeenthong leg., **SOUTHERN:** 1♂ (THNHM-I-25977), Trang Prov., Palian Dist., Ton Tae Waterfall., light trap, 20.XI.2020, W. Jaitrong, T. Jeenthong & P. Teakul leg.; 1♂ (THNHM-I-26134), same locality, 14.VIII.2020, T. Jeenthong leg.; 1♂ (THNHM-I-26133), same locality, 24.XII.2020, T. Jeenthong & P. Teakul leg.; 2♂ (THNHM-I-25009 and THNHM-I-25010), Nakhon Si Thammarat Prov., Tha Sala Dist., Khao Nan N.P., Khlong Yod Nam, 30.X.2008, T. Jeenthong leg.; 1♀ (THNHM-I-22553), Nakhon Si Thammarat Prov., Tha Sala Dist., Sunandha Waterfall, 31.X.2005. T. Jeenthong leg.; 1♂ (THNHM-I-22554), Nakhon Si Thammarat Prov., Tha Sala Dist., Khao Nan N.P., Head Quarter, 47 m a.s.l., Light trap, 22.XI.2006, J. Nabhitabhata [= Jin] *et al.* leg.; 3♂ (THNHM-I-22555 to THNHM-I-22557), same locality and collector, 23.XI.2006.; 1♂ (THNHM-I-22558), Nakhon Si Thammarat Prov., Khao Nan N.P., Papra Station, 240 m a.s.l., Light trap, 26.XI.2006, J. Nabhitabhata [= Jin] *et al.* leg.; 2♂ (THNHM-I-22559 and THNHM-I-22560) Nakhon Si Thammarat Prov., Tha Sala Dist., Khao Nan N.P., Huai Lak, 27.I.2007, T. Jeenthong leg.; 3♂ (THNHM-I-22561 to THNHM-I-22563), Nakhon Si Thammarat Prov., Nopphitam Dist., Khao Nan N.P., Lam Nam Khlong Gay, 10.XII.2007, T. Jeenthong leg.; 9♂ (THNHM-I-22564 to THNHM-I-22572), Nakhon Si Thammarat Prov., Sichon Dist., Khao Nan N.P., Yod Nam Waterfall, 1.II.2008, T. **Acknowledgments**

We would like to express our deep gratitude to the Thailand Institute of Scientific and Technological Research for Hawkmoth's specimens in the collection. We thank Ms. Waleeprawn Roagluan for preparation and labeling the specimen. We also thanks Mr. Michael Cota for reading through an earlier draft of this paper.
